About Me

Programming	Python, JavaScript , Java
Front-end web	HTML , CSS/SCSS , ReactJS/React Redux , VueJS
Back-end web	NodeJS , Express , PHP
Database	MongoDB , MySQL
Design	Photoshop

Projects

Web Development

Nov. 2020 – (Current)

- Ecommerce web project
  Frontend: HTML , CSS/SCSS , JavaScript, ReactJS
  Backend: ExpressJS
  Database: MongoDB

  Ecommerce web app

Experience

University of Canterbury

Assignments

Christchurch, NZ
Feb. 2020 – June 2020

- COSC364 Computer Networking
  Programming Language: Python

  Task: Develop a representation program showing the RIP routing protocol

  Role: Per programmed visual representation of a RIP routing protocol

  Skills Gained: Deep understanding of the RIP routing algorithm

- INFO263 Web Design and Development
  Frontend: HTML , CSS , JavaScript , JQuery , AJAX
  Backend: PHP
  Database: MySQL

  Christchurch, NZ
  Jun. 2019 – Nov 2019

  Task: Connect frontend to backend server.

  Role: Program an application to handle and receive http request calls to the server.

  Skills Gained: PHP development, MySQL development.

- SENG301 Software Engineering
  Programming language: Java

  Christchurch, NZ
  Jun. 2019 – Nov 2019

  Task: develop a discourse application to monitor user discourses and create discourse chats, while implementing tests

  Role: per programming in development, design and testing of discourse application

Skills gained: programming design with per programming experience and testing

- COSC363 Computer Graphics
  Programming language: C++

  Christchurch, NZ
  Jun. 2019 – Nov 2019

  Task: develop a graphical scene, using 2D/3D object representations, transformations, modelling and rendering algorithms. Using OpenGL programming.

  Skills gained: C++ and OpenGL programming experience.

- SENG365 Web Development
  Frontend: HTML , CSS , VueJS
  Backend: NodeJS , ExpressJS
  Database: SQLite , phpMyAdmin

  Christchurch, NZ
  Feb. 2019 – Jun 2019

  Task: Backend web API / Frontend web development.

  Role: Build a backend api based on specific requirements and connect frontend website to backend server through http request calls.

  Skills Gained: express server development, vueJS development, Increased knowledge of frontend and backend systems.

- SENG201 Software Engineering
  Programming Language: Java

  Christchurch, NZ
  Jun. 2018 – Nov 2018

  Task: develop a Java game program using the java GUI library, while implementing tests

  Role: per programming in developing command line program and connect to GUI program

  Skills gained: further developed knowledge in Java Programming and OOP, gain experience in per programming and Git

- ENCE260 Computer Systems
  Programming Language: C

  Christchurch, NZ
  Jun. 2018 – Nov 2018

  Task: Build a game program with supported functionality for a small embedded system with an assigned partner, we decided to build the game battle ships for the small micro controller.

  Role: per programming for a small embedded system.

  Skills Gained: Increased Knowledge in C programming language, gained experience with per programming and GitHub (code management), understanding of embedded systems.

Education

University of Canterbury
Batchelors in Computer Science

Christchurch, NZ
Feb. 2017 – 2020
